

Become a Citizen Climate Advocate: *Create a Livable World for our Children*

At a time when we need to urgently transition from fossil fuels to clean forms of energy, Citizens' Climate Lobby (CCL) is a beacon of hope. CCL is a non-partisan grassroots advocacy organization that empowers citizens to build public and legislative support for a **revenue neutral carbon tax (carbon fee and dividend)** that equitably returns 100% of the revenues to American households.

What: Presentation-*Citizens Taking Action on Climate Change to Create a Livable World for our Children*

Who: Elizabeth (Lisa) Del Buono MD, CCL volunteer and Climate Reality Presenter, will discuss how a **steadily increasing fee on carbon** would provide a market-based incentive to transition rapidly to clean forms of energy, thereby decreasing greenhouse gas emissions while at the same time stimulating the economy and producing jobs.

When: Monday, August 11, 7pm

Where: The Ecology Center, 339 E. Liberty, Suite 300, Ann Arbor, 48104

Why: Michigan is already seeing the effects of climate change. Scientists predict that if we continue on our current trajectory, the effects of climate change will become significantly worse during our children's lifetime. **We urgently need to take action to protect our children's future.** Economists on all sides of the political spectrum agree that placing a fee on carbon is the most effective method to bring down emissions quickly.

Join us to learn how **you** can make a difference. Come prepared to learn about the issues, write letters, and take action that could literally "mean the world" to your children and grandchildren.

This event is sponsored by the Ann Arbor Chapter of Citizens' Climate Lobby (annarbor@citizensclimatelobby.org) and The Ecology Center (<http://www.ecocenter.org>).
